Table of contents

- Quick Introduction about the Arabic Langauge.
- How Arabic diacrticts can play a big role in your Arabic localization projects.
- Arabic Dialects and recommended dialects for your project.
- What to consider when localizing for the Middle East Market.
- How international speakers can recognize issues in Arabic localization.
- Free solution tool for Bi-directional languages.

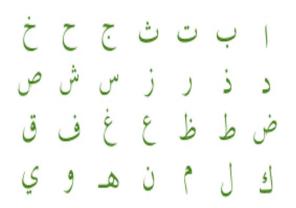

How many facts from the below did you hear before?

- Arabic is a Right to left "RTL" language.
- Official language in more than 20 countries.
- More than 400 million speakers.
- There are no "capital" letters in Arabic.

Info about the Arabic language

- Arabic is a right to left language and a bi-directional language: both writing scripts with different directions (left-to-right and right-to-left)
- Official language in more than 20 countries and have more than 400 million speakers.
- For Arabic script language, expect Approx. 30% text expansion when translating.
- Arabic does not support abbreviations.
- Arabic does not have upper case and lower case letters.

Figure 21: Splitting a text into 3 directional runs.

Intro into Arabic Localization

Info about Arabic Numbers

- Arabic numbers can be written in two ways either with Arabic number (Latin shape) or Arabic
 Indic/Hindi numbers.
- The use of Western and Eastern Arabic numerals varies among countries and regions and even among areas within the same country or region.
- When UI changes from one direction to another, numbers are not mirrored.

Arabic Number (Latin shape) 1234567890

Arabic Indic/Hindi numbers | \text{VYE07VA9}

What are Arabic diacritics?

- Also known as ArabicText Discretization (ATD).
- Signs written below or above the letter.
- Different pronunciation.

Diacritic	Arabic	Transcription		
fathatan	بً	an		
dammatan	بٌ	un		
kasratan	ب	in		

Why are Arabic diacritics important to the localization community?

- It plays a critical role when it comes to Arabic MSA voice over.
- To clear ambiguity in written/translated projects.
- Text to speech service.

Effect of Arabic diacritics on translation

To know

Flag

To summarize :

- Arabic diacritics plays a critical role when it comes to Arabic MSA localization.
- To clear ambiguity in written/translated projects.
- It's important to have a language monitor for Arabic MSA dubbing projects.
- It affects text to speech services.

Arabic Dialects

Different Arabic dialects:

MSA

VS

Local dialects

Local Arabic dialects:

- The spread of the Arabic language through different Middle Eastern countries.
- Colonization.
- Regional and Geography variation.

Local Arabic dialects:

- North African countries:
 - (Moroccan, Algerian & Tunisian)
- Gulf Countries:
 - (Saudi Arabia, UAE, Kuwait, Oman, Qatar, Bahrain)
- Levantine Countries:
 - (Lebanon, Jordan, Syria & Palestine)
- Egyptian dialect

MSA Modern standard Arabic

MSA dialect introduction:

- MSA stands for Modern standard Arabic.
- It refers to eloquent speech (light Fusah)
- It is understood by all Arab countries along with their local Arabic dialect.
- Taught in schools.
- The preferred dialect to select when you consider learning Arabic.

What to consider when choosing your project Arabic dialect?

- What message you want to deliver and to whom?
- Project domain and subject.
- What are you localizing?

A5 size is preferable A leaflet is more likely to be kept if it is a convenient size e.g. able to fit in a medicine bag or pocket

Non-transparent paper Text showing through from the reverse side makes letters and words difficult to

Matt surface Glossy paper makes reading difficult by reflecting too much light

Consistent use of layout Consistent organisation within the leaflet gives visual clues to the proximity

Headings and grouping of textual elements and headings

Plenty of white space A page of close-set type easily daunts readers and there is a long tradition in design that the 4 margins are never equal in width

Clear separation of columns When space is limited clearly separating columns of text, including using vertical rules, can help reading

Typography

12-point minimum type size Twelve-point text produces documents intended for general readers

Conventional typefaces The general public is familiar with such typefaces, that are clear and legible when printed and copied

Not more than 2 typefaces One face for the text and one for the captions is less confusing for the

Interline spacing of 125% of 12-point type (5mm Strips of white space between lines help the eye to separate one line from another; 125% of the type size as the line space avoids the text looking cramped and crowded but any wider than this makes the lines appear to float apart

Avoid unnecessary capitals Lower case letters give shape to words and so are easier to recognis and read than all upper case

exture helps reading by allowing the eye to link words together and is best achieved using

Maximum line length of 50-65 characters or 8-11 words Very short lines break up sentences too nuch; long lines tend to lose attention

Fext should not be wrapped around illustration This can result in unaligned left-hand margins and ery short line lengths

Text should not be printed over pictures Over printing of pictures, especially if a dark background s used, makes reading very difficult as it limits contrast and confuses the eye

onsistent use of headings This aids readability and location of information by clearly differentiating tween groups of related items

Table of contents desirable This helps to locate specific instructions or explanations and can be a ry important aid in a long leaflet

umbered headings recommended These help cross-referencing and avoid repetition

Bullet points recommended This format is cleared r seguential information

Bold or boxed in type for emphasis This is preferable to all upper case and multiple cueing stems can be confusing

Black print on a white background This gives the pest contrast and greatly enhances readability pecially for people with visual impairment

One extra colour, if used, for headings This can e helpful, if used consistently and the contrast with he background maintained, to emphasise headings

fellow should not be used The appearance of vellow printing ink is as good as invisible to visually mpaired people

How Arabic should look

مقالة اليوم المختارة

طائفة الحشاشين أو الحشاشون أو الحشيشية، هي طائفة إسماعيلية نزارية، انفصلت عن الفاطميين في القرن الحادي عشر الميلادي لتدعو إلى إمامة نزار المصطفى لدين الله ومن جاء من نسله، واشتهرت ما بين القرن الحادي عشر والقرن الثالث عشر الميلادي، وكانت معاقلهم الأساسية في بلاد فارس وأيضاً في الشام بعد أن هاجر إليها بعضهم من إيران. إن أقدم تطبيق كتابي لمصطلح "حشيشية" على النزاريين نجده في الرسالة التي كتبها الخليفة الفاطمي الآمر بأحكام الله سنة 1123م والمرسلة إلى الإسماعيليين في الشام (إيقاع الصواعق الإرغام) وكان الهدف من هذه الرسالة نقض مزاعم نزار المصطفى لدين الله بالإمامة والتأكيد على شرعية الخط المستعلي وقد استُخدم فيها مصطلح الحشيشية مرتين. أستس الطائفة

الحسن بن الصباح الذي اتخذ من قلعة آلموت في فارس مركزاً لنشر دعوته؛ وترسيخ أركان دولته. اتخذت دولة الحشاشين من القلاع الحصينة في قمم الجبال معقلاً لنشر الدعوة الإسماعيلية النزارية في إيران والشام. مما أكسبها عداءً شديدًا مع الخلافة العباسية والفاطمية والدول والسلطنات الكبرى التابعة لهما كالسلاجقة والخوار زميين والأيوبيين بالإضافة إلى الصليبيين، إلا أن جميع تلك الدول فشلت في استئصالهم طوال عشرات السنين من الحروب. كانت الاستراتيجية العسكرية للحشاشين تعتمد على الاغتيالات التي يقوم بها "فدائيون" لا يأبهون بالموت في سبيل تحقيق هدفهم. حيث كان هؤلاء الفدائيون يُلقون الرحب في قلوب الحكام والأمراء المعادين لهم، وتمكنوا من اغتيال العديد من الشخصيات المهمة جداً في ذلك الوقت؛ مثل الوزير السلجوقي نظام الملك والخليفة العباسي المسترشد والخليفة العباسي الأخر الراشد وملك بيت المقدس كونراد المونفيراتويّ. وقد جاءت نهاية هذه الدولة في إيران عند الغزو المغولي الثاني بقيادة هو لاكو عام 1256م بعد مذبحة كبيرة وإحراق القلاع والمكاتب الإسماعيلية وسرعان ما تهاوت الحركة في الشام أيضاً بعد أن فقدت استقلالها السياسي على يد الظاهر بيبرس سنة 1273م.
